

# ExactFlat

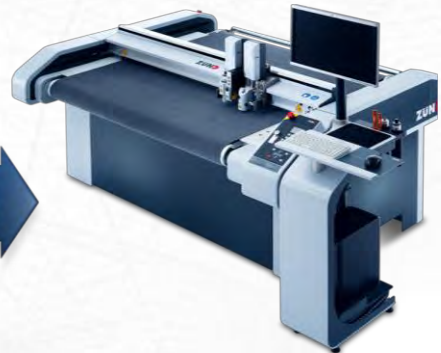

DESIGN + FLATTEN + PATTERN + NEST + COST + DOCUMENT

## Faster, Simpler Product Development

Automate the design & development for products covered in fabrics and made from composites.

CAD-TO-CUTTER

ExactFlat makes it faster and less complicated to design, develop, prototype, cost and manufacture soft goods.

# Developed for SolidWorks® users working with composites, industrial fabrics & technical textiles.

**1 Design:** Create pattern elements from CAD geometry quickly and easily inside SolidWorks®.

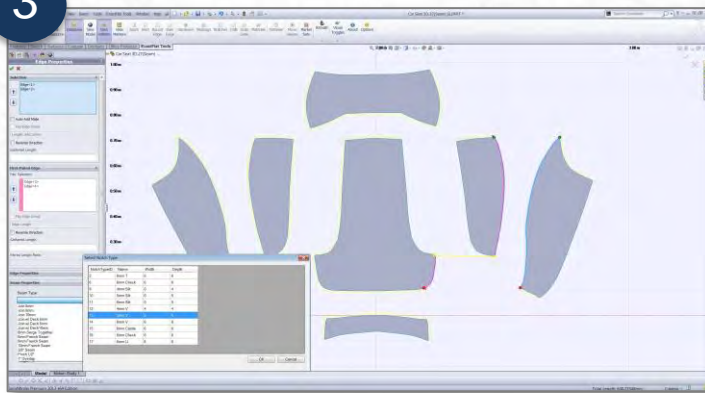

**2**

## Flatten

Flatten complex, non-developable 3D surfaces into accurate 2D flat patterns faster by automating the flattening process.

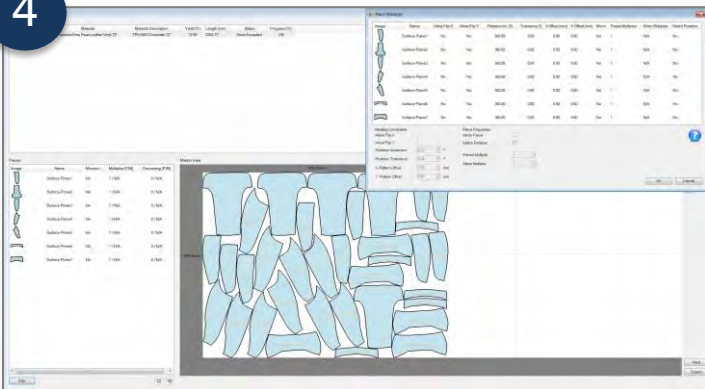

**3**

## Pattern

Create and change seam lines, notches, grain lines, and other pattern design tasks faster and more flexibly with parametrically-linked patterns and real-time feedback.

**4**

## Nest

Faster and more accurate results with production-level nesting integrated within the design process - for every user.

**5 Export:** Export designs to CNC fabric cutters.
